- Provides performance increase needed to run Microsoft's® next generation Desktop OS
- Supports Windows 98, Windows 95, Windows NT®, Windows 3.x & DOS
- Software reinstallation not required
- Includes illustrated guide for easy installation
- Three-year warranty

## Evergreen Performa 400 Processor Upgrade

The Evergreen **Performa 400** is a high-performance subsystem upgrade for 233 MHz and higher speed Pentium II® processor-based PCs. The Performa 400 can increase a PC's performance to that of an original 400 MHz system and features the newest Intel® Celeron™ design with MMX™ support included.

This innovative upgrade allows users to migrate to 400 MHz applications. The Performa 400 delivers the power and performance needed for today's software and more demanding Windows® 2000 applications.
